## Personal Profile

I am Sareen Ahamed. A bachelor of Information and communication technology (Software Technology Specialization) student looking for real world experience in this field. Interested in learning more about the development of web applications, mobile applications, and accessible software. Has experience in implementing computer systems in university projects, helping a new generation of students to become digitally literate. Capable of working both individually and in a team, with skills in both writing and debugging programs. Through my education and experience, I have developed my communication skills to the highest standard to offer the finest results.

## Projects

### Sareen Ahamed | Personal Portfolio Web App

- Designed and developed a high interactive personal portfolio using **JSX**, **Tailwind CSS**, **React Router**, **React Scroll** and **Framer Motion**, showcasing projects in a clean, responsive layout.
- Integrated smooth scroll navigation and animated route transitions, enhancing user experience and accessibility.
- Ensured pixel-perfect utility styling and consistent responsiveness with Tailwind CSS.
- Leveraged Framer Motion for advanced animations, creating a visually engaging and modern interface.

### WeatherWithSareen | Weather Application

- Developed a weather application using **JSX**, **CSS** and the **OpenWeather API**.
- Integrated real-time data to display current weather conditions, including temperature, humidity, and forecast, based on user location.
- Utilized **React.js** to manage state and dynamic content, enhancing performance and user experience.

### MealMart | Ecommerce Application

- Developed a responsive web application using **React.js**, **Tailwind CSS** and **Framer Motion**, offering an intuitive meal planning experience.
- Designed a user-friendly interface with seamless navigation and interactive animations to enhance user engagement.
- Enabled efficient meal selection with modern front-end technologies and best practices.

### Doctor Appointment Booking System | Web App (Ongoing)

- Collaborating with a team of 5 to develop a web-based system for doctors and patients to register and book appointments.
- Leading the frontend development using **React.js** and **Tailwind CSS** to ensure a responsive and user-friendly interface
- The project utilizes the **MERN Stack** for full-stack development

## Languages

**English** Professional proficiency

**Tamil** Native proficiency
